**Student Self - Evaluation**

**Directions:** Think about your work with your team on the Mars rover and the criteria for the project. Give yourself a score of “1” if you feel that you could have done a better job in a particular area. Give yourself a “2” if you did an especially good job in that area; and a score of “3” if you went above and beyond the criteria and did an especially outstanding job. Be honest with yourself – we’ll also evaluate your work and your team’s rover.

**Evaluation of my own participation:**

- [ ] 1. I was a hard-working, dedicated, and focused member of my team.
- [ ] 2. I made suggestions and listened to others’ ideas.
- [ ] 3. I encouraged others to participate and share their ideas.

**Evaluation of the rover:**

- [ ] 4. Our rover has a clear purpose(s) and its special design and parts would help it complete the mission successfully.
- [ ] 5. The design of my team’s rover includes its source of power and has features indicating how it will be controlled.
- [ ] 6. My team’s rover design takes into consideration the conditions on Mars and has features to allow it to perform its tasks.
- [ ] 7. The written portion of our project clearly describes our rover and explains how it works.

**Evaluation of our team:**

- [ ] 8. We found ways to agree on the plan for our rover.
- [ ] 9. Our team worked well together. Each team member contributed and worked to accomplish our goal.
